Tiivistelmä

PROBLEM TO BE SOLVED: To prepare an arabinose-containing fruit or vegetable juice further increased in a function such as controlling effect on elevation of blood glucose level, supposed to be caused by a disaccharide hydrolase inhibitory activity involved in L-arabinose.

SOLUTION: This arabinose-containing fruit or vegetable juice is characterized by including an L-arabinose-containing fraction obtained by subjecting an enzyme to strained lees of fruits or vegetables containing arabinan, arabinoxylan or arabinogalactan.
